

# Tudor Buildings

LO: I can identify the key features of Tudor Buildings

## Wattle and Daub

Houses were made of wooden frames. The gaps were filled with woven twigs (**Wattle**) and dung (**Daub**) was smeared over the top.

# Black Timber.

The wooden frame was often covered in black tar to stop it from rotting.

# Wooden Frame.

Tudor houses were made from wooden beams. The beams were uneven because they were cut by hand not by machine.

## Steep Roof.

Tudor homes had a steeply pitched roof of either clay tiles or thatch.

# Jetty.

The upper floors of Tudor houses stick out further than the downstairs. This is called the Jetty.

# Tiny panes of glass.

Tudor houses were the first ones to use glass in their windows but it was very expensive to make big pieces.

# Key Features.

- Wattle and Daub
- Timber
- Wooden Frame
- Steep Roof
- Jetty
- Tiny Panes of Glass

Wattle and Daub

Tiny Panes of Glass

Steep Roof

Jetty

Black Timber

Wooden Frame

Is this house old or new?

What clues can you find?

Is this house old or new?

What clues can you find?

Your task is to  
design and make  
your own Tudor  
house.

Will it be a grand, symmetrical Tudor  
property or a more tradition looking black  
and white building?

I would prefer it to be 3D like this one here and there is a link to creating your  
own here: <https://www.youtube.com/watch?v=vx3l8ebV0eY>

If you don't have access to the resources then drawing one would be just as  
good. If want to, you could try drawing it in 3D, here's a clip to help get you  
started <https://www.youtube.com/watch?v=W4t8ZxcazCQ>
